

# Who we are, what we do, why we do it

Design Denmark is an alliance of design doers, thinkers and users that work professionally with design. We represent individuals and organizations with a connection to Denmark and our alliance will always remain open, inclusive and unfinished.

To members, we offer services that help them grow and speak on their behalf with a united voice. We encourage debate about design-related issues and advocate the use of design-led solutions throughout society.

We do this because we couldn't dream of doing anything else. To us, design brings meaning into the world. So we invite all with a similar passion to join us to demonstrate and communicate – both in Denmark and abroad - the great value of design.
